5 NICE LITTLE STORIES

1. Once, all villagers decided to pray for rain, on the day of prayer all the People gathered but only one boy came with an umbrella.... **THAT'S FAITH**
2. When you throw a baby in the air, she laughs because she knows you will catch her..._**THAT'S TRUST**
3. Every night we go to bed, without any assurance of being alive the next Morning but still we set the alarms in our watch to wake up... **THAT'S HOPE**
4. We plan big things for tomorrow in spite of zero knowledge of the future or having any certainty of uncertainties...
THAT'S CONFIDENCE
5. We see the world suffering. We know there is every possibility of same or similar things happening to us. But still we get married??... **THAT'S OVER CONFIDENCE!!**

The Story of a Woodcutter...

Once upon a time, there was a very strong woodcutter. He asked for a job from a timber merchant, and he got it.

The pay was really good and so were the work conditions.

For that reason, the woodcutter was determined to do his best. His boss gave him an axe and showed him the area where he was supposed to work.

The first day, the woodcutter brought down 18 trees. The Boss was very much impressed and said, "Congratulations, Go on that way!"

Very motivated by the words of the boss, the woodcutter tried harder the next day, but he only could bring down 15 trees.

The third day he tried even harder, but he only could bring down 10 trees. Day after day he was bringing down less and less trees. "I must be losing my strength", the woodcutter thought to himself.

He went to the boss and apologized, saying that he could not understand what was going on.

"When was the last time you sharpened your axe?" the boss asked.

"Sharpen? I had no time to sharpen my axe. I have been very busy trying to cut trees.

The moral of the story :

Our lives are like that. We sometimes get so busy that we don't take time to sharpen the axe. "

In today's world, it seems that everyone is busier than ever, but less happy than ever. Why is that?

Could it be that we have forgotten how to stay sharp? There's nothing wrong with activity and hard work. But we should not get so busy that we neglect the truly important things in life, like our personal life, taking time to read etc. We all need time to relax, to think and meditate, to learn and grow. If we don't take time to sharpen the axe, we will become dull and lose our effectiveness. So start from today, think about the ways by which you could do your job more effectively and add a lot of value to it.

Hope this story has given you some insight to life, may you be happy always!

PREPARE FOR THE UP-SWING THAT WILL FOLLOW THE RECESSION.

Robot(1948)-|walter creates the first electronic robot. Robots,in onegise or another, Had been suggested,as far back as 1945,when leonardo vinci created his mechanical knight robot.however the firstsignificant robot prototypes,built in 1948,were a pair of tortoise like robots named elmer and elsie.created by inited states-born Neurophysilogist and inventor dr.william grey walter(1910-1977),thetortoise robots were remarkable in their ability to mimic life like behavior.These experimental robots incorporated sensors for light and touch,as well as motors for propulsion and steering,and a two-vaccum tube(valve) analog"computer".with the aid of simple circuitry,these Electromechanical,three-wheeled robots were capable of phototaxis(anautomatic movement toward or away from light),and could thus findtheir own way to a recharging station when they ran low on "food"-aprecursor of the technique used in the popular sony aibo robot dog Some sixty years later.using a combination of light-level and motor-power settings,four modes of operation were possible.this produced a variety of unique behavior patterns in the tortoises.in oneexperiment,Dr.walter called his tortoises"machinaspeculatrix". Designed to aid the study and testing of theories of behavior arising from neural interconnections,these small robots with reflexes were hugely influential in the birth and development of the sciences of cybernetics and robotics.

Rearranging the letters

Saibal Sen
(Faculty)

DILIP VENGSARKAR

When you rearrange the letters:
SPARKLING DRIVE

PRINCESS DIANA

When you rearrange the letters:
END IS A CAR SPIN

MONICA LEWINSKY

When you rearrange the letters:
NICE SILKY WOMAN?

DORMITORY

When you rearrange the letters:
DIRTY ROOM?

ASTRONOMER

When you rearrange the letters:
MOON STARER

DESPERATION

When you rearrange the letters:
A ROPE ENDS IT

THE EYES

When you rearrange the letters:
THEY SEE?

AND FOR THE GRAND FINALE

MOTHER-IN-LAW

When you rearrange the letters:
WOMAN HITLER!!!

Collection of Leave letters

This is a collection of leave letters (belongs to the genre of **chere de ma kende banchi!**) and applications written by people in various places of India :

"As I am suffering from my uncle's marriage I cannot attend class" **From H.A.L.Admin department**

"As my mother-in-law has expired and I am the only responsible person for, Please grant me 10 days leave"

Letter written for application of leave

"My wife is suffering from fever and I am her only husband at home, I may be granted leave."

Letter writing

"I am in well here and hope you are also in the same well"

Another gem from ITI Leave Letter from an employee who has performing his daughter's wedding

"As I am marrying my daughter, Please grant me a week's leave.

"A candidate's application

"This has reference to your advertisement calling for a 'typist' and an Accountant-Male or Female'- As I am both for the past several years and I can handle both; I am applying for the post'

"ITI Bangalore: An employee applied for leave as follows:

"Since I have to go to my village to sell my land along with my wife. Please sanction me one-week leave.

"Another employee applied for half-day leave as follows:

"Since I've to go to the cremation ground at 10 O'clock and I may not return, pls. grant me half day casual leave'

" A leave letter to the headmaster:

"As I am studying in this school I am suffering from headache. I request you to leave me today."

Human diet-Diet denotes the group of all edible substances essential for growth and maintenance of the body. The important components of diet are proteins, fats, carbohydrates, vitamins, salts and water. Dietary needs vary from person to person and age to age. The diseases which are caused by deficient diet are known as deficiency diseases. Balanced diet or mixed diet provides all the essential constituents necessary for growth and maintenance of the body. It must contain all the essential constituents in adequate amount. The ratio between proteins, fats and carbohydrates should be 1:1:4. The food should be easily digestible and given according to age. Cooking of food is essential because it sterilises foodstuffs, makes them palatable and easily digestible.

Ancient Aliens Mystery

Sudip Ghosh (IISD)

According to many archaeologists, ancient astronaut theorists and main stream scientists, Earth was visited in the past by extra terrestrials with superior knowledge, forever changing the course of human history. What if it were all true? Many questions, theories and research has been brought up about this topic. As the awareness and curiosity of many individuals began to grow, a lot more government paid occupations had been created regarding this topic. New discoveries regarding such a topic have been exposed by fully researching in to it, asking the who, what, when, where, why and HOW. Many curious and bright minded individuals have come together to figure out such a mystery. There are many strong indications. But, in the end, what you believe is yours to decide.

The Nazca Lines

Drawn into a high plateau in Peru's Nazca Desert, a group of ancient designs stretching more than 50 miles has astounded archaeologists for decades. Along with simple lines and geometric shapes, drawings of animals, birds and humans have also been made, some measuring 600 feet across. From their colossal size, the drawings can only be viewed and appreciated from way up in the air and there is no evidence that the Nazca people invented flying machines. According to ancient astronaut theorists, the figures were used as guidelines for spaceships as they came in for landing, and the lines served as runways.

Vimanas

Many Sanskrit stories, which were written in India more than two millennia ago, contain information about mythical flying machines called “Vimanas”. Comparing the similarities between descriptions of Vimanas and people who have observed UFO's, ancient alien theorists have suggested that India was visited in the past by astronauts from other planets.

Pyramids of Giza

Ancient alien theorists believe that visitors from other planets helped humans build architectural wonders like Egypt's Giza Pyramid. Not only is Giza an incredible feat of engineering for its time, but it lies at the intersection of the longest lines of latitude and longitude. How is this possible? Did the builders of the pyramids already understand the Earth was round and its dimensions?

Teotihuacan

Ancient alien theorists have pointed out that some ancient monuments demonstrate a thorough knowledge of astronomy surpassing knowledge of later cultures. The Pyramid of the Sun at Mexico's Teotihuacan, lies at the center of a complex of pyramids, each aligned with a planet in the solar system.

The Sumerians

The Sumerians are one of the oldest civilizations known to man. The Sumerians believed they were created by the Annunaki, which was a group of E.T's. The Sumerians believed the Annunaki came from the stars to planet earth to mine for gold. According to ancient myths, the Annunaki needed workers to mine for gold, so they genetically engineered and created the Sumerians (or humans).

Pacal's Sarcophagus

From Southern Mexico, Pacal the Great ruled over the Mayan city of Palenque, during the seventh century. He was buried inside a pyramid called the Temple of Inscriptions. The intricately carved lid of his sarcophagus has become a classic work of Mayan art and also proof and evidence for ancient alien theorists. In their view, Pacal is pictured in a spaceship during takeoff, with his hand on a control panel, his foot on a pedal and an oxygen tube in his mouth.

Puma Punku

Located in South America, in the Bolivian highlands, Puma Punku is a field of stone ruins scattered with enormous, finely carved blocks. Such precise workmanship on a massive scale would have been nearly impossible without modern tools and machines, yet the ruins are more than 1,000 years old. Ancient alien theorists have hypothesized that extraterrestrials with advanced engineering techniques created the site or advised the people who built it. The Stones of Puma Punku are made up of granite and diorite, and the only stone harder is diamond. Not only were these stones really hard to cut, but they were also extremely heavy. One of these stones weighs 800 tons!

Aliens and the Third reich

Invading armies of almost invincible power, incredible weaponry designed to intimidate and annihilate. During the second world war, Germany possessed the most technologically advanced military in the world. Weapons such as the jet aircraft, precision bombers and guided missiles, all designed to blitzkrieg along Europe. They developed the first cruise missile, the V1 buzz bomber and the V2 the first ballistic missile. German scientists were the envy of the world, but what made them so advanced? Were they simply smarter than others? They were simply viewing ancient texts not as legendary myths, but as source of historical and scientific fact. The Nazi's were the best oriental scholars in the world, so they translated ancient texts such as the Hindu Sanskrit in to German.

In 1939, German scientists invented their own flying saucer shaped aircraft and called it the "Haunebu". When the Nazi party swept in to power in 1933, The Vril society encouraged Hitler and his henchmen to fund a world wide search of ancient alternative technologies. German scientists and researchers scoured the planet for ancient texts and relics, such as the holy grail and the arc of the covenant. Much more evidence points to the Nazi's dealing with alien technology.
